L&S Lighting Intelligence | FORMA E FUNZIONE®

Pure

Useful and emotional, a complete lighting solution for home environments integrating functionality and design.

Designed as a useful tool for lighting and organizing the kitchen environment, where particular attention is required to neat and correct arrangement of each accessory, Pure also fits in other home contexts as a furnishing and decorative lighting element.

IP44 protection, ideal for damp location installation. Easily integrated into existing contexts and finished furnishings, Pure can be customized with a range of practical accessories for every need.

IDEAL FOR

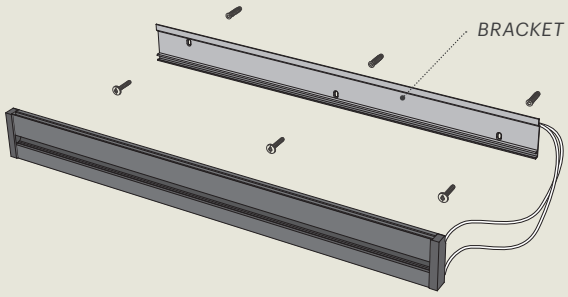
- kitchen
- living room
- bathroom

FEATURES

- versatility
- easy installation
- range of accessories
- IP44
- furnishing light

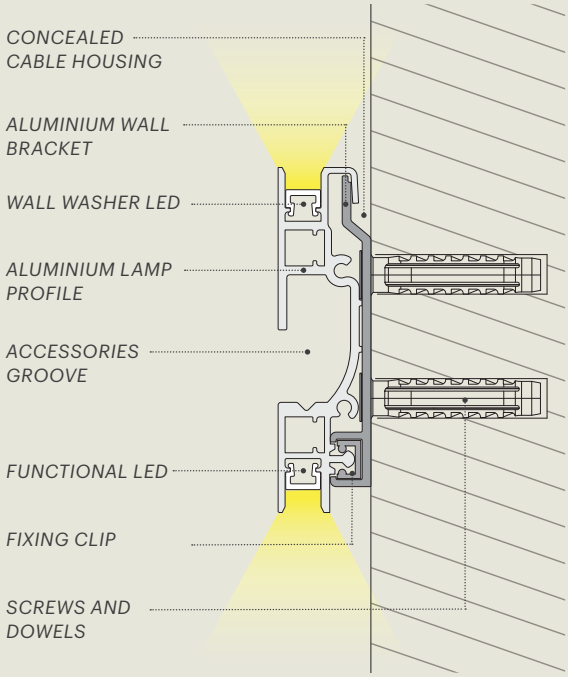
Easy installation in every context

Quick and intuitive fixing, also ideal for integration into finished furnishings. The lamp profile snaps onto a mounting bracket made of extruded aluminium, fixed to the wall by means of screws and dowels (not included, the number varies based on the length of the lamp; use fixing accessories suited to the wall material). It is possible to conceal the power cables of both LED strips behind the lamp inside the wall bracket, so arranging the cable exit where most appropriate.



Double high efficiency LED light source

Pure integrates a double high efficiency LED light source: the upper one acts as wall washer, the lower as functional light. The lamp design, with the recessed positioning of both LED screen covers, ensures anti-glare effect. The EDC Dual Color light sources allow the choice of color temperature during installation (jumper cable) or dynamic adjustment via remote control.



IP44 protection, a solution for every need

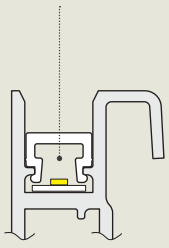
Maximum adaptability for integration into any environment: Pure has an IP44 protection rating, making it ideal for environments exposed to humidity. The light source is available with Single color LED strips and EDC Dual Color, allowing color temperature adjustment from warm white 3000K to natural white 4000K.

IP44 WW

LED REEL + SCREEN
6,3W/m - 1100lm/m

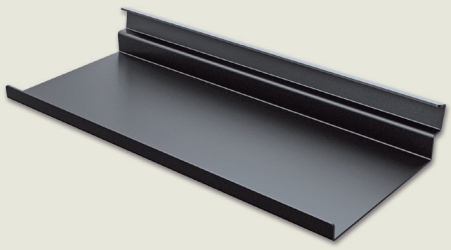
IP44 EDC

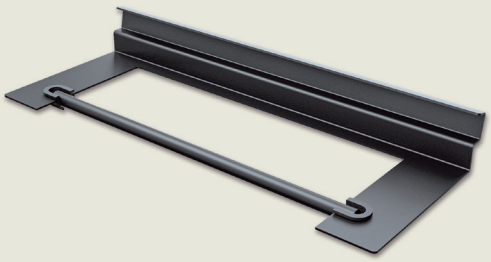
LED REEL + SCREEN
9,6W/m - 1100lm/m



Wide range of functional accessories

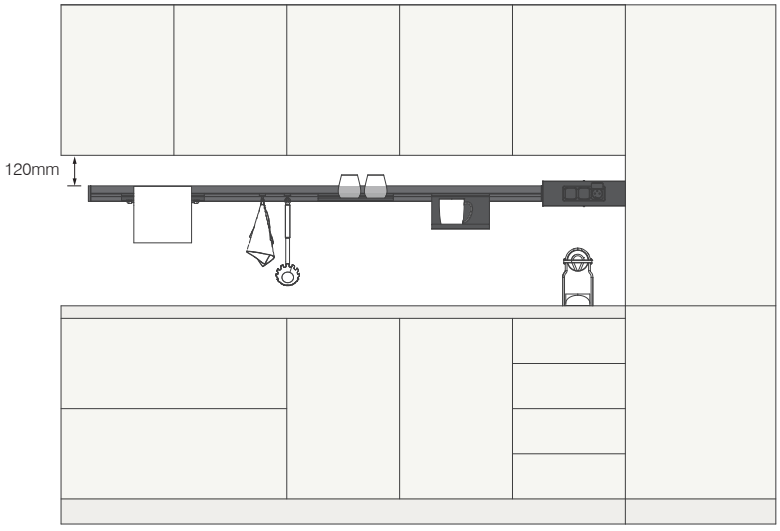
Pure can be customized with various accessories, functional solutions for best usability and organization of any environment. Each component of the range is easily removable and repositionable at will, ensuring maximum versatility. The electrical sockets range, specifically designed for kitchen environments, allows for practical cable management, facilitating the installation of Pure in each home context or finished furnishings, without the need for interventions on the electrical wall system





Remote control of both LED sources

Personalized lighting effects wih MEC Driver, the power supply and receiving modules system, which allows individual or simultaneous remote control of both LED light sources. Switching, intensity adjustment and color temperature regulation at your will with L&S Smart control systems (such as radio controls and sensors) or via smartphone or voice control systems.



Example of kitchen under-cabinet installation. For proper installation of all accessories (p.12) and sockets (p.10) **the lamp profile must be installed at a distance from the wall unit of 120mm** (optimal distance between wall units and worktop between 50 and 60cm)

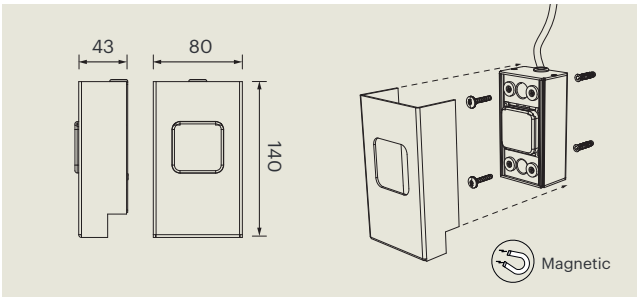
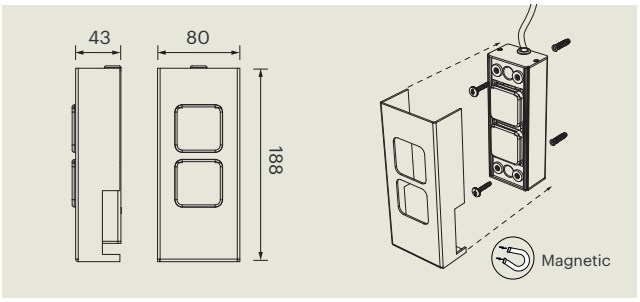
PURE - Vertical sockets 220-240V AC

dimensions in **mm**



1x SCHUKO - SINGLE VERTICAL SOCKET

03	**599900001**	Magnetic cover	80 x 43 x 140mm

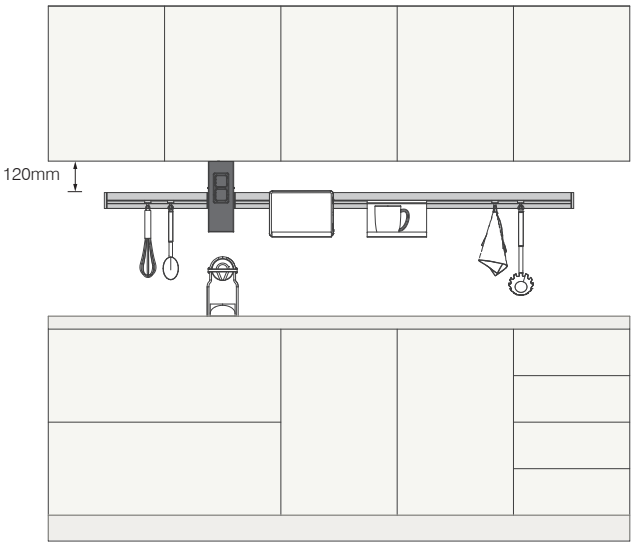


2x SCHUKO - DOUBLE VERTICAL SOCKET

03	**599900002**	Magnetic cover	80 x 43 x 188mm

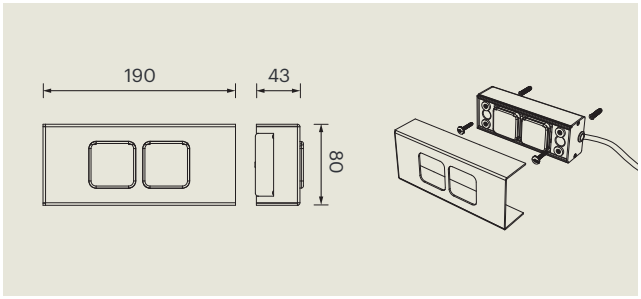
Functional solutions for installing extra under-cabinet sockets without the need for interventions on the wall system, also concealing the lamp's power cables (exit behind wall units). The single socket is to be installed resting over the profile of the lamp and can be added any time. The double socket is instead installed between two distinct aligned lighting fixtures. Each socket is equipped with a IP44 covers and is supplied with a 2000mm 220-240V AC power cable.

For proper installation of vertical sockets, Pure lamp profile must be installed at a distance of 120mm from the wall unit



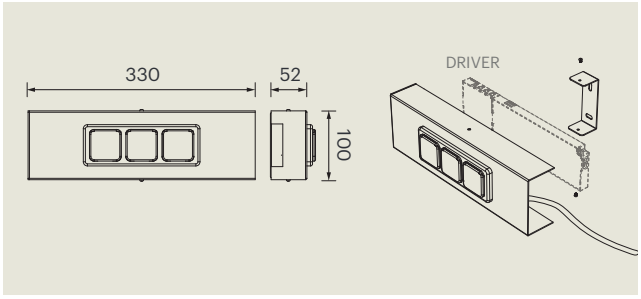
PURE - Linear sockets 220-240V AC

dimensions in **mm**



2x SCHUKO - DOUBLE LINEAR SOCKET

03	**599900003**	Magnetic cover	190 x 43 x 80mm



3x SCHUKO - TRIPLE LINEAR SOCKET (FOR MEC DRIVER HOUSING)

03	**599900004**	Driver not included	330 x 52 x 100mm

Horizontal sockets with an essential and linear design, designed for installation next to column units at the sides of the lamp profile: behind the sockets it's possible to conceal the lamp's power cables (exit behind column unit). Each socket is equipped with IP44 covers and is supplied with a 2000mm 220-240V AC power cable.

Inside the triple socket it is possible to house any MEC Driver complete with control module.
